

Technical Data Sheet

Product Name	BAST Mn Plus
Description	A concentrated liquid fertilizer with manganese
Appearance	Pink-brown liquid
Solubility	Miscible with water in all proportions. Contains water insoluble ingredients.
Typical pH	9.0-11.0
Typical Density	1.6±0.05 g/cm ³
Typical Analysis	200 g/l - manganese (Mn) 150 g/l - magnesium (MgO) 80 g/l - nitrogen (N) 80 g/l - zinc (Zn) 70 g/l - copper (Cu)
Packing	1 l, 5 l, 10 l

APPLICATION RATES AND TIMINGS

CROPS	BAST Mn Plus Foliar application
CEREALS	1-2 l/ha at tillering stage. Repeat application at flag leaf stage, For autumn sown crops, an application prior to winter dormancy may also be beneficial. In addition, 1 l/ha from second node detectable to flag leaf fully emerged (Zadoks G.S. 32 to 39). Water rate: 200-300 l/ha.
MAIZE	1-2 l/ha at 4 - 8 leaf stage. If necessary, repeat at 10 to 14 day intervals. Water rate: 200-300 l/ha.
POTATOES	1-1.5 l/ha up to the start of flowering. If necessary, repeat at 10 to 14 day intervals. Water rate: 300-400 l/ha.
